

CAREER NEWSLETTER

Week 6 - Term 1, 2017.

FOCUS ON HEALTH SCIENCES

Do you love health and science and would like to diagnose and treat musculoskeletal issues? You may consider exploring the following occupations:

Osteopathy: You can study undergraduate osteopathy at:

- [RMIT](#)
- [Victoria University](#)

Chiropractic: You can study undergraduate chiropractic at:

- [RMIT](#)
- [CQU](#)

Myotherapy: You can study undergraduate myotherapy at:

- [Southern School of Natural Therapies](#)
- [Endeavour College of Natural Health](#)

Physiotherapy: You can study undergraduate physiotherapy at:

- [La Trobe University](#)
- [Australian Catholic University](#)
- [Charles Sturt University](#)
- [Monash University](#)

Podiatry: You can study undergraduate podiatry at:

- [La Trobe University](#)
- [Charles Sturt University](#)

Massage, Remedial Massage and Myotherapy: you can undertake vocational courses at most TAFE institutes.

You may also like to explore **Prosthetics and Orthotics** as a career. You can study the Bachelor of Applied Science/Master of Clinical Prosthetics and Orthotics at [La Trobe University](#).

Pathways: A Diploma or Bachelor of Health Science can be used as a pathway into many of these courses. Check with individual institutions for preferred pathways they may have into their degree courses.

Mr. S Martin
(Career Adviser)

VOCATIONAL AND HIGHER EDUCATION NEWS

Course Information

The following documents have been prepared to outline course information for particular career areas:

- [Business Schools and Courses](#)
- [Health Schools and Courses](#)
- [Nursing Courses](#)
- [Paramedicine Courses](#)

These documents (and other helpful career information) can be found on the Careers page of the School website –

www.moamagrammar.nsw.edu.au/teaching-and-learning/secondary-school-7-12/careers-education/

Interested in film production?

Fresh out of RMIT, James Wan co-directed the super successful blockbuster Saw with fellow alumnus Leigh Whannell. Now he directs multi-million dollar Hollywood productions such as The Conjuring 2 and the upcoming DC Comics production, Aquaman. Read James' story as he describes his journey from studying Media and Communication at RMIT to finding success on the world stage,

Do you enjoy learning about animation AND science?

With rapid advances in the world's understanding of human biology, we can start to paint a very real picture of what happens inside our bodies every time we walk outside.

At the Walter and Eliza Hall Institute of Medical Research (WEHI) in Victoria, award-winning artist Drew Berry leads a team of biomedical animators who bring to life the incredible activity that goes on deep inside the human body.

Their latest biomedical animation, Sunshine Vitamin, shows you just how important sunshine is to your health, and the processes it triggers to keep you strong, <https://careerswithstem.com/blog/biomedical-animation/>

Have you considered studying cyber security?

RMIT Bachelor of Computer Science student Jon Butler was one of only eight students from across Australia recently selected for the CommBank Cyber Prize 2016, which is awarded to the country's top cyber security students. As well as receiving \$1,000, Butler's prize included an invitation to the bank's Sydney head office for presentations, mentoring and a tour of their national security centre. Read Jon's story here

Exciting news!

Refraction Media has just released the new the double edition Careers with Science & Health magazine. Careers with Science & Health not only shows you how to get a job you'll enjoy, but also one that allows you move quickly from one field of expertise to the next, helping to solve some of society's major challenges along the way. We call it STEM + X – where 'X' is your passion, hobby, another field of interest or even a world-changing goal.

Your 'X' could be anything. For example, health + music could lead to a new therapy that lowers patients' stress levels. Or astronomy + film could lead you to create amazing planetarium shows. Computer science + maths could lead to new ways of visualising research, using 3D immersive data display or virtual reality tools. Careers with Science & Health includes over 65 real-life reads and 150 STEM + X degrees in science and health fields, plus job and salary data. To read the magazine, go to <https://careerswithstem.com/read-it-here/>

UPCOMING EVENTS

Photography 130 Exhibition

Photography training at RMIT is as old as the institution itself, dating back to 1887. While much has changed in photography over the past 130 years, the skills involved in composition, in challenging the limits of the camera or in capturing that special moment, are as valuable today as they were 130 years ago.

Photography 130 features the work of more than 100 RMIT photographers, in realms of practice that include art, science, commercial advertising, discovery, photojournalism and entertainment. See what makes photography at RMIT so remarkable. The exhibition will run between Friday 10 March – Thursday 13 April. For information on the event, go to

www.rmit.edu.au/events/all-events/exhibitions/2017/march/photography-130

Science in the City, RMIT

You and your parents will be able to learn about the science programs on offer at RMIT, which include biology, biotechnology, chemistry, environmental science, food science, nanotechnology and physics. You will also be able to undertake a laboratory tour at the City Campus and speak to lecturers about how you can broaden your career options and give yourself a competitive edge. The event will run Thursday 30 March. There are limited spaces, so register now –

www.eventbrite.com.au/e/science-in-the-city-lab-tour-tickets-31470376744
