Transition Program

## Showcasing Years 7 and 8

Moama Anglican Grammar's next Open Afternoon on 15 June is a unique opportunity for 2019 Year 7's to participate in the second stage of our Transition Experience Program. The focus of this Open Afternoon is to showcase the Year 7&8 program and welcome students and families into our secondary school.

For many students transition from Primary to Secondary schools evokes a variety of emotions, including feelings of excitement, anxiousness and more than a few butterflies in the tummy! For families also, it is an exciting and challenging time.

We provide Year 7 2019 students with opportunities to develop social relationships within their year level, extend their knowledge about what it will be like to be a Moama Anglican Grammar secondary student and to build their personal confidence.

The Open Afternoon Showcase Year 7&8, will involve our current Year 6 students and new students offered places for 2019. The afternoon will consist of a brief introductory session by the Principal and Heads of School who explain the culture, ethos, structure and operations of the school. This will be followed by a rotation through activities for all students for Year 7 2019 and their parents.

The activities consist of a tour of the school by our school ambassadors. We encourage you to ask as many questions as you like of our ambassadors to hear their unique perspectives on being a student at Moama Anglican Grammar.

The other activities are "mini" lessons for Year 7 2019 students to participate in. We believe strongly that we have the best educational program and most expert teachers in the area. These "mini" lessons are designed to engage students and allow for the building of relationships between all members of the new cohort.

The passage from primary to secondary school is one of the biggest changes a young person will experience. Moama Anglican Grammar's Transition Program is well-planned and implemented to support students, their families and school staff in the process of transition. Our program's multi-faceted approach provides the pathways to settle well into school life, demonstrate greater levels of interest in school and school work and display higher levels of self-esteem and confidence.
